Art Unit: 1625

1. Claims 13-37 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

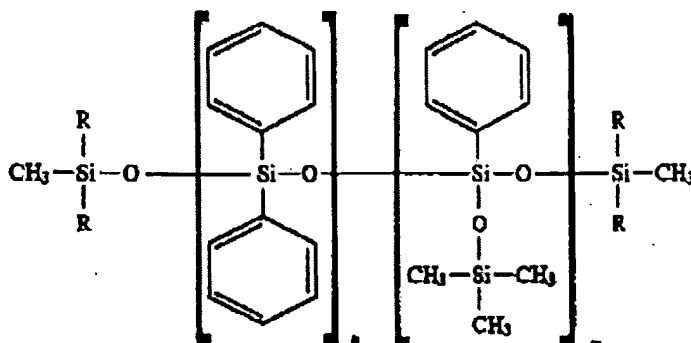

Claims 13-37 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Written description for 'a non-volatile silicone fluid' other than the silicone oil of formula (I) in the claims is not found in the specification.

On page 2, lines 16-22, applicant discloses that:

'After a great amount of research it has now been found, surprisingly and unexpectedly, that, by combining a ***particular silicone oil*** an a wax made from an ethylene homopolymer or copolymer, the choice of which was based both on the melting point and on the molecular mass, it was possible to produce silicone-oil-based, homogeneous anhydrous cosmetic compositions, without being limited by a restrictive range of proportions.'

Moreover, page 3, lines 3-19 discloses that the instant invention concerns a silicone oil-based cosmetic having a homogeneous fatty phrase characterized by the fact that the fatty phase incorporates a mixture comprising a particular wax and at least one silicone oil in a proportion of 5 to 97% by weight of said fatty phase and ***corresponding to the following formula (I)*** :

Art Unit: 1625

wherein R represents alkyl containing 1 to 30 carbon atoms, aryl or aralkyl, n represents a whole number between 0 and 100, and m represents a whole number between 0 and 100, provided that the sum n+m is between 1 and 100.

The present disclosure of a 'particular' silicone oil therefore does not convey to the skilled in the art the instantly claimed solid silicone composition comprising a particular polyethylene solidifying agent in combination with an unspecified 'non-volatile silicone fluid.'
